

# Commercial Bred Heifers

Our ranch is located in northern Wyoming. Almost a third of our herd runs on summer range in the Big Horn Mountains above 8000 feet, and the rest run east of Sheridan in hilly country. We were having high altitude issues with our calves on the mountain range, so in 2014 we bought our first set of PAP tested McConnell bulls. We experienced immediate results from our first set of calves out of the low PAP bulls. We have been customers ever since.

We raise all of our own replacements so we want good-doing, well-balanced cows that raise good females and steer calves that bring premiums when we sell them. Our steer calves consistently "top" Superior Livestock Auction Big Horn Classic video auction held in August every year.

The ranch has been in David's family since the late 1800's, currently operated by David and Terri Kane, along with the youngest son, Nate, his wife Molly, and their daughters being the sixth generation coming on board.

We take a lot of pride in the cattle that we raise and expect them to perform without a lot of pampering. Good udders, sound structure, and good dispositions are required to add to the longevity in our herd. The bulls that we choose to breed to our first calf heifers have worked well. Most births are unassisted and the calves have good vigor and perform well.

We are excited to offer our bred heifers for sale with the McConnell family. They are bred to low birthweight, calving ease McConnell Angus bulls. They are functional and should bring performance along with soundness and longevity to your herd.

David & Terri Kane, Nate & Molly Kane & family

## Group 1
